DETAILED ACTION

Election/Restrictions

Examiner withdraws the requirement for election of species because Applicant in the Response received 28 April 2006 has admitted that strontium ferrite and barium ferrite are not patentably distinct and similarly that iron and magnetite are not patentably distinct at page 2 of the Response. Examiner takes the language of “not patentably distinct” to mean obvious variations of one another.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 14 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mauldin et al. (US 6,660,242 B2).

As to claims 14 and 16, Mauldin et al. discloses a mixture that is capable of being a mulch of self-coherent particulates of ceramic material of barium or strontium ferrite (col. 4 lines 38-42; col. 7 lines 5-6) and iron or magnetite (“ferric oxide” of col. 4 lines 38-42; col. 7 lines 5-6). Not disclosed are the ceramic particles from 1-25 mm and at least 50% of the mixture. It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the mixture of Mauldin et al. by making the ceramic particles from 1-25 mm and at least 50% of the mixture depending upon the uses and needs of the mixture.

Response to Arguments

Applicant's arguments with respect to claims 14 and 16 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Davis and Adel et al. disclose in the prior art various magnetic particles.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
